## Research & Work Experience

### Graduate Research Assistant

NLP Lab, George Mason University

Fairfax, VA, USA

May 2022 - Present

- Advisor: Dr. Ziyu Yao
- My research focuses on the **interpretability of language models**, spanning behavioral interpretability (explaining behavior through input-output analysis) and mechanistic interpretability (understanding model internals). I am also equally interested in applying these insights to practical domains such as output steering, performance improvement, and AI safety.
- We recently conducted Tutorial on Mechanistic Interpretability for Language Models, **ICML 2025**.
- We are organizing The First Workshop on the Application of LLM Explainability to Reasoning and Planning @ **COLM 2025**

## Graduate Teaching Assistant

George Mason University

Fairfax, VA, USA

Aug 2021 - April 2022

- Teaching Assistant for Computer Systems and System Programming (CS531) & Essentials of Computer Science (CS110).

## Machine Learning Engineer

Infodev Pvt Ltd

Kathmandu, Nepal

April 2019 - June 2020

- Led a research and development team for the integration of semantic search enhanced by named entity recognition (NER) within an e-commerce platform. Additionally, worked on projects involving face recognition, facial aliveness detection, object detection, and localization for various prototypes.
